

Summer School on Digital Signal Processing using MATLAB

ECS Department of Dronacharya College of Engineering, Gurgaon organized a Summer School on "**Digital Signal Processing using MATLAB**" from **27th June-18th July 2016** at the college campus. The program was conducted by **Ms. Parul Bansal (Assistant Professor, ECS)**. The objective of this summer school was to give the students a detailed overview of Signal processing and its concepts and applications in industries and the program mainly focused on the concepts of signal processing and their simulation through MATLAB. Several students from VI semester attended the program. The program was very informative and interactive as students got practical exposure to this field. This program further helped to inculcate the knowledge gained in their major projects and real life applications.
